Training:
Hacking 101

Date of the training: **March 12-13,2018** in Heidelberg, Germany

Book Now using the voucher code: **TR18HMTSEB** and save an additional 5% of the current valid rate of any package!

Overview

This two-day workshop gives an insight to a broad variety of hacking techniques. Experts from ERNW show you everything from basic principles up to common and more advanced tricks to break modern security mechanisms. The subjects of this workshop cover network security, low level software exploitation, reverse engineering, web application hacking and more. As an attendee, you will learn to think and act with the mindset of an attacker. Understanding their routine, tools and procedures will enable you to gain a novel outside perspective onto your current setups and deployments. With this knowledge, you will find yourself capable of locating and addressing the most pressing threats faster and more efficiently. This session is brought to you by seasoned experts from ERNW. With loads of experience in the field, pentesting is said to be their favorite discipline in the world of IT security.

Don't hesitate to call us. We're fluent in English and German of course.

Requirements:

- Bring your own Laptop with administrative privileges, including pre-installed VirtualBox (VMware Workstation or VMware Player should work, too). If your Laptop don't have an Ethernet port anymore, please bring also an USB Ethernet Adapter with you, if possible.

- Basic knowledge of networking and working with command lines (especially on Linux) is strongly recommended, but not required.

About Your Trainer: Sven Nobis

Sven Nobis works as a Security Analyst at ERNW performing application and infrastructure assessments. He is mainly focusing on web application security but is also interested in mobile security. Besides IT security, he is a passionate developer and trying to link his experiences to the everyday work.

About Your Trainer: Malte Heinzelmann

Malte Heinzelmann is currently studying Applied Computer Science at Heidelberg University and works as a Security Analyst at ERNW. He mainly performs penetration tests focusing on web application security. Besides his work for ERNW he regularly participates in speed game development and capture the flag hacking contests.
