

Training:

Mobile Applications Pentesting

Date of the training: **March 18–19, 2019** in Heidelberg, Germany

Book Now using the voucher code: **TR19_HMTS** and save an additional 5% of the current valid rate of any package!

Overview

Workshop about security and pentesting of different types of mobile applications.

Our workshop addresses security of mobile applications of different types and platforms. By the end of this workshop, attendees will be able to conduct a full pentest of mobile applications. We start from the basics, so no experience in mobile security field is required.

Attendees will learn about Android and iOS platforms and their security measures, in addition to how their respective apps work and their different kinds of vulnerabilities. Of course, there are many exercises and hands-on, as we understand and attack Android, iOS and web-based mobile applications. You will learn how to use effective tools and different techniques to analyze apps, locate vulnerabilities and exploit them. Furthermore, attendees will experience hooking and manipulating apps using Frida and other techniques. Moreover, we touch web applications vulnerabilities and their impact on mobile applications.

Our Agenda includes the following

1. Introduction
2. Brief about Web app testing
3. Web-based mobile apps
4. Mobile apps pentesting
5. Android Platform
6. Android app pentesting
7. iOS platform
8. iOS Pentesting
9. Advanced Techniques

Requirements

- Laptop with Virtual Box setup.

About the Speaker: Ahmad Abolhadid

Ahmad is a security consultant at ERNW in Heidelberg. He has an extensive experience in penetration testing of mobile and web applications, infrastructure and telecommunications. He also holds a master's degree of Communications and Media engineering from HS Offenburg. In addition to breaking stuff, Ahmad builds pentesting tools and holds workshops to help pentesters to make the world a safer place.
