

Training:

Hacking 101

Date of the training: **June 27-28, 2022** in Heidelberg, Germany

Book now using the voucher code: **TR22_HMTRAINING** and save an additional 5% of the current valid rate of any package!

Overview

This two-day workshop gives an insight to a broad variety of hacking techniques. Experts from ERNW will show you everything from basic principles up to common and more advanced tricks to break current security mechanisms. The subjects of this workshop will cover network security, low-level software exploitation, reverse engineering, web application hacking and more.

As an attendee, you will learn to think and act with the mindset of an attacker. Understanding their routine, tools, and procedures will enable you to gain a novel outside perspective onto your current setups and deployments. With this knowledge, you will find yourself capable of locating and addressing the most pressing threats faster and more efficiently.

This session is brought to you by seasoned experts from ERNW. With loads of experience in the field, penetration testing is said to be their favorite discipline in the world of IT security.

Who should attend this training?

The workshop will give attendees an insight into the hacking techniques required for penetration testing. This workshop is for beginners in the IT security field as well as professionals who want to get more practical experience in hacking and penetration testing.

Requirements

The attendees should have:

- Bring your own Laptop with administrative privileges, including pre-installed VirtualBox (VMware Workstation or VMware Player should work, too). If your Laptop don't have an Ethernet port anymore, please bring also an USB Ethernet Adapter with you, if possible.
- Basic knowledge of networking and working with command lines (especially on Linux) is strongly recommended, but not required. Also, being familiar with a programming/scripting language is considered useful.

About the Trainers:

Sven Nobis works as a Security Analyst at ERNW, performing application and infrastructure assessments. He is mainly focusing on web application security and cloud infrastructure security. Besides IT security, he is a passionate developer and trying to link his experiences to the everyday work.

Julian Suleder is a Senior IT Security Researcher & Consultant at ERNW Research GmbH in Heidelberg. His special research interest is the security of active medical devices. Besides IT security, he researches in the special interest group Consumer Health Informatics (CHI) of the German Association for Medical Informatics, Biometry, and Epidemiology (GMDS).
