

Training:

Web Application Security 101

Date of the training: **June 24th – 25th, 2024** in Heidelberg, Germany

Book now using the voucher code: **TR24_HMTRAINING** and save an additional 5% of the current valid rate of any package!

Overview

Ready to fortify your web applications? This workshop dives deep into the OWASP Top 10, the essential framework for understanding and mitigating web security risks.

Sharpen your Skills:

- Gain a comprehensive understanding of the OWASP Top 10, including injection flaws, broken authentication, and cross-site scripting (XSS).
- Learn practical techniques for vulnerability assessment and secure coding practices.
- Solidify your newfound knowledge by identifying and exploiting these vulnerabilities in a safe, controlled environment. (Capture the Flag style).

By the end of this workshop, you'll be able to:

- Spot OWASP Top 10 vulnerabilities in real-world applications.
- Integrate secure coding practices into your development process.
- Confidently discuss and mitigate web application security risks.

Who should attend this training?

This session is geared towards developers and security professionals.

Requirements

The attendees should have:

- Bring your own laptop, only a Browser is needed.
- Basic knowledge of web technologies is recommended, but not required.

About the Trainers:

Marcel Sinn is a Security Consultant at ERNW Enno Rey Netzwerke GmbH and part of the penetration testing team. His focus is mainly on classic penetration and infrastructure testing, cloud security, operational technology as well as threat modeling. Besides his IT-Security Master at the TU Darmstadt, he established different security structures in the public sector in the context of medical and personal data. The focus was on SoC, CERT, incident response, vulnerability management, SIEM and asset management.

Daniel Schlecht works as a Penetration Tester at ERNW. His special interest is to contribute to the Open Source Community by searching for and disclosing vulnerabilities.

Nicolas Giraud is an IT security analyst and consultant at ERNW. In the previous years he both designed multiple web applications and conducted numerous penetrations tests and assessments of web applications for diverse customers.
